Restaurant Review

BY: Masrafi Shahab

Hado Sushi & Thai Cuisine

When you go to Hado Sushi & Thai Cuisine, you must try out many sushi dishes. My favorite is the Shrimp Tempura Roll. It is very tasty. Basically, first you have the sushi rice, water, rice vinegar, sugar, salt, seaweed, pre-cooked tempura shrimp, cucumber, avocado, and black or white sesame seeds. If you go into the restaurant you're going to like how it looks. Automatically, when you go inside you get the smell of the sushi and much more. The service is very good. The restaurant is clean and they are very kind to you. The best part of the meal will probably be eating sushi at lunch time. It is the best time to have it. So, if you never ever tried going to Hado Sushi & Thai Cuisine, I recommend trying it. You are going to love it!!!!!!!

Restaurant Review

BY: Nasif Ehan

Were you ever so hungry that you would eat anything? Well I have the perfect restaurant for you. The restaurant's name is Aria Kebab, and the best meal to get from there is a large plate with rice chicken bread and a lot more! It is so good! The appearance of the restaurant is amazing! It looks like a luxury restaurant. It has the name of the restaurant on it and the best part is it is extremely clean! And to be honest, I love the service! They always come and ask you what you need, and a bonus for the kids they have bubble gum and candy! The best part of the meal is the outstanding flavor and the juiciness that is in the chicken. I would recommend this to others! The age really does not matter. All ages will like the food here at Aria Kebab. I hope you go there to try the food!

Fortnite Review

BY: Monica Aldana

The purpose of the game is to level up and rank up, but too have fun! You can create your person with the clothes you earn in the games. There are many events you have to get to earn legendary clothes, skins of players and weapons and you even get backpacks, notes, money, and diamonds in the game. You also get parachutes, you get car skins, emotes and dances you get rare or default avatars, skins for your death tomb, air surfboards, cards to change your name, and cards to level up.

You can talk with other people around the world and there are a lot of forms to play. The rules are easy: survive and win the game, only 10 minutes 1 player survives.

I will recommend it to others, at most ages. But not all ages can play that game. You only have to have fun!

Pokemon Review

BY: Brandon Alvarado

My favorite game and toy is Pokemon and Popplio. The purpose of the game is to catch all of the Pokemon and battle other people. The toy is a pokemon that is in the game. The purpose of the toy plush is to cuddle it and play with it! The rules of the game is to make a team of Pokemon and battle and train them and the toy plush is to have fun. I would recommend it to everyone. Even my sister likes Pokemon and other people on Youtube like pokemon too! Watch the trailer on Youtube to learn more (that is how I learned how to play the game) :)

Jenga Review

BY: Cristel Garcia

A game I have recently played is Jenga. What you have to do is build first. So, you take three blocks and stack them with three on one side and three on another and keep doing that until there is no more. Then, you take one out and put it on top and take turns doing that. If it falls, you lose and then you have to build it again. Even my mom and Dad had fun!

In addition, you can build lots of things with the blocks like a house or a huge tower! You can also play with little kids. I recommend this for everyone except for little babies who might bite it and lick it and you don't know where that's been! One more thing- you can also buy jumbo, small or medium. It's fun to play and the rules are easy but the game takes time!

An Old School Game

BY: Miguel Juarez

A game I played when there wasn't any coronavirus and we were still in school was a game called "tag" and the concept of the game was simple. First you had to pick who should be "it" and when you do you should run as soon as you can because since the purpose of the game was to not get tagged by whoever is "it" and if you do then you will now be "it" and the previous "it" won't be "it" no more. I would recommend this game to others since it can help you lose some weight since you are running a lot and even if your "it" you are still going to be running and I guess this is for everyone who can run and is 4+ since we don't want kids to get hurt right? Of course there will be other games that have similar rules like there is one game called "freeze tag" which has a similar concept as "tag". The way you play "freeze tag" is that someone is going to be "it" and they have to tag other players and when they do that player would have to stop moving and freeze and to make them unfreeze is that a regular player would have to tag them so they can play the game again, when "it" tags everyone he/her wins.

Whatever Floats Your Boat

BY: Diganta Roy

My favorite video game is Roblox and the game name is Whatever Floats Your Boat. In this game you have to build a boat with all your materials you have until the flood comes. When the rain begins, you have to fight with cannonball or your gun. This game is kind of hard to play because you have to build a boat quickly because other players will damage your ship and you pay for it. But you will be a pro when you have a lot of money to buy supplies. I think this is for teens because it's a lot of hard work to be a pro and kids might be angry if they lose everything.

MineCraft in Review

BY: Harley Hernandez

Minecraft is the game that I enjoy the most to play with my cousin. The purpose of the game is to survive and make a house so you can live also you have to make a sword to hunt so you can live. The object is to like find new things so you can complete challenges and you have to beat the game. In order to beat the game you need to defeat the ender dragon. The rules are easy. I think 10 and 11 year olds would like to play minecraft because the rules are simple.

The Flash: A Review

BY: Nasif Ehan

A very interesting movie that I have watched not too long ago is The Flash. The author of this movie is Gardner Fox. The movie was about a boy named Barry Allen who was turned into the fastest man alive, and he also had a very sad back story. His back story is that a bad guy named Professor Zoom killed Barry's mother and wanted to ruin his life. Professor Zoom framed Barry's dad for killing his mother even though he did not. There are some sad parts, but also very interesting parts. Just in case you are going to watch the movie I'd rather not spoil it! Anyways, I really did like all the characters because all of the characters always help the flash/Berry when he needs help most. They understand what he is going through, so they always are on the move in the lab trying to find out who killed his mother and trying to find out how to destroy him. The movie was rather exciting unpredictable and very catchy because in the movie there are parts where Barry runs on a building or powers a plane with his own power/electricity and speed. And there are parts where you think that the flash will annihilate the bad guy but he ends up being let's just say "slightly bruised". I do recommend it to others to watch and especially to boys 5 years and up because not only is this a very kid friendly movie also because like I said, it is very interesting. This is my movie report. I hope you agree and you watch the movie.

A Review of Gravity Falls

BY: Marlon Portillo

The story of Gravity Falls started with Mabel and Dipper going to their Uncle Grunkle Stan's house. They settle in and then Wendy (who Dipper has a crush on) comes to the Mystery Shack (which looks like "the mystery hack" because the S fell off). There is a funny guy called Soos who is the most kind. Gravity Falls is not scary or funny, but it's interesting. We later find out that Stan is not really Stan but Stan's brother (Stan the real one died and disappeared) no spoilers about who we are talking about! There are three books in this story. At the end of season two, you will continue to have questions. Season three might come out! And I'm looking forward to it.

A Review of Raising Dion

BY: Hiram Miranda

I watched this movie called Raising Dion. It was about a dad whose name is Mark and he was a scientist with this half weirdo, also best friend Pat. They went to Iceland to discover the Northern Lights. It was lighting so bright he thought it looked so beautiful. The next two weeks he had superpowers which are invisibility and teleportation. He got these from Iceland during the event. But he found someone the same as him. Her name is Charlotte. Then there was a storm and Mark died from it but at least he helped Charlotte. Two days later his son has the same superpower as his dad. This movie was so interesting because it's cool how his dad gave him superpowers. I'll recommend it to others because both genders would be perfect and age same as usual.

A Book Review for Explorers

BY: Vijay Singh

I think Explorers is a good book because I really like going back in the past and learning about history about a person or an expedition that they did with other explorers. The book is about explorers and we are learning about them and what makes them an explorer. Learning about an explorer's past is fun because you can see what they have gone through to earn the name "Explorer". It wasn't funny nor scary, but it's mostly exciting and fun. I would recommend it for all types of genders and ages because I enjoyed this. Older people like to explore more so they might like it too!
